

ReadyAXS Software

SFT-RA-01

OSSI's ReadyAXS is a user friendly, feature-rich software package designed specifically to manage Electronic Access Control (EAC) applications from 1 to 32 doors standard.

ReadyAXS allows the installer to configure a small-sized to medium sized access control application in minutes.

This intuitive, IT friendly, server EAC software platform gives both the installer and end-user a powerful, yet friendly environment to administer virtually all their access control needs.

The product supports many features found traditionally in enterprise level platforms.
